SAFEWAY

A powerful antioxidant that helps boost the immune system and is important during the winter season. It helps retain already healthy cholesterol levels, and produces collagen critical for healthy cardiovascular function. Some scientific evidence suggests that consumption of antioxidant vitamins may reduce the risk of certain forms of cancer. However, FDA has determined that this evidence is limited and not conclusive. Chewable tablets are frequently used by individuals who have difficulty swallowing tablets. USP has tested and verified ingredients, potency, and manufacturing process. See www.uspverified.org USP sets official standards for dietary supplements. Suggested Use: Chew one tablet daily, preferably after a meal. These tablets have a fabulous orange flavor and may be dissolved in the mouth or chewed.
