

MEDICAL GRADE MANUKA HONEY is filtered and processed to proprietary standards to eliminate all contaminants, such as wax and pollen, then gently pasteurized while protecting the enzymes, proteins and active fractions that make **MEDICAL GRADE MANUKA HONEY** a special ingredient in modern healthcare.[†]

High quality raw manuka honey will eventually crystallize. This does not affect the health benefits. If jar is placed in hot water and stirred crystals will dissolve.

Methylglyoxal 400 mg/kg MGO 400
