

SUGGESTED USAGE: Take 1 capsule 2 times daily, or as directed by your healthcare practitioner.

HOW IT WORKS: Arginine and citrulline are two amino acids that are integral to protein metabolism and utilization, as well as to the maintenance of muscle tissue and nitric oxide production.* Both are key intermediates in the urea cycle, where they participate in the detoxification of ammonia via the production of urea.* In addition, any arginine not converted to urea enters general circulation where it is distributed to various tissues and metabolized for other uses such as protein synthesis.*

CAUTIONS/INTERACTIONS: For adults only. Consult your healthcare practitioner if pregnant/nursing, taking medication (especially antihypertensives, nitrates, or other heart medications), or have a medical condition (especially herpes, kidney impairment and/or glaucoma). Keep out of reach of children.
