

WHY ARE PROBIOTICS IMPORTANT?

Probiotics can provide your body with a much-needed balance of "good" bacteria within the digestive tract and help keep you, and your gut healthy while improving food absorption and overall digestion. Studies also suggest Probiotics help defend against occasional constipation, diarrhea, gas & bloating.*

COMPLETE PREBIOTIC & PROBIOTIC offers the live bacteria of a **Prebiotic** combined with the bacterial energy sourcing of a **Probiotic** to help deliver optimal digestive health.*

Probiotics are a type of "good" bacteria in the intestinal tract that aid in digestion and immune functions. Probiotics may help with inflammation, and boosting immunity.*

Prebiotics are non-digestible components of our diet that are fermented in the colon increasing the growth of "good" bacteria.*

OLYMPIAN LABS uses the technology of delayed release capsules to help ensure the highest levels of beneficial bacteria in each dose. These advanced capsules protect against harsh stomach acids, allowing the Pre and Probiotic to reach the intestinal tract. This method will allow the probiotics to flourish and maximize their potency, supporting optimal digestive and immune health.
