

SUGGESTED USAGE: Take 1 capsule daily with a meal, or as directed by your healthcare practitioner.

HOW IT WORKS: Pyrroloquinoline quinone (PQQ) is a B vitamin-like compound that not only helps to protect mitochondria from free radicals, it also promotes the production of new mitochondria within cells.* Mitochondria are the parts of the cell that produce energy. While all cells have them, the heart and brain are especially dense with mitochondria due to their high energy demands. PQQ may thus help to maintain robust cellular energy production, support heart health, and promote normal cognitive function.* Extra Strength PQQ includes alpha-lipoic acid to complement its free radical scavenging abilities.*

CAUTIONS/INTERACTIONS: For adults only. Consult your healthcare practitioner if pregnant/nursing, taking medication, or have a medical condition. Keep out of reach of children.
