

Scientific studies have demonstrated the remarkable health benefits of cinnamon, one the most common spices in the world. These studies have shown cinnamon helps maintain healthy glucose levels* within the normal range. CinnaCARE® contains Cinnulin PF®, a patented and clinically tested cinnamon extract. A water extract, processed without solvents, Cinnulin PF® isolates the active Type A Polymers and virtually eliminates unwanted compounds often found in other cinnamon extracts. Type A Polymers are the bioactive compounds shown to be responsible for Cinnamon's benefits. CinnaCARE® also contains a proprietary GlucActive™ blend that further supports healthy glucose levels,* while Bioperine, a powerful black pepper extract, helps maximize absorption and utilization.
