THE BIGGER PICTURE OF GLUTAMINE

Glutamine is the most abundant amino acid in the body and plays an important role in muscle protein development. During prolonged periods of intense exercise glutamine levels may be depleted faster than the body can replenish them, which limits protein synthesis and encourages muscle breakdown.¹ Our Glutamine 1000 Caps are formulated for rapid disintegration and provide 1,000 mg of pure L-Glutamine per capsule so they deliver a quick, powerful dose each and every time.

WHY IT'S MADE BY ON: Quality matters. Only ON Nutrition can guarantee that every capsule is made with 100% pure L-Glutamine. We use only the highest quality ingredients and our state-of-the-art manufacturing process to ensure every capsule is made to the highest standard.

100% GUARANTEED PURE.
