Experience the Cranberry Advantage

✓ ActiFruit is made from whole fruit—other products use only the juice

ActiFruit™

CRANBERRY FRUIT CHEW

What are PACs?

Proanthocyanidins (PACs) are a class of flavonoids found in fruits and seeds that provide protective benefits. But not all PACs support urinary tract health.* A-type PACs from cranberries provide urinary tract benefits.*

Cranberries contain Type-A Proanthocyanidins (PACs), which are the key actives in cranberry that support urinary tract health.*

ActiFruit is standardized from unique varieties of cranberries, including **Early Black**, which contain a higher natural potency of PACs.

Recommendation: 1 soft chew daily.

Supplement Facts

Serving Size 1 Soft Chew

Amount Per Serving	% DV
Calories	20
