ALA- Alpha lipoic acid mimics insulin and increases your muscle up take of glycogen and increases muscle cell volume and contributes that full pumped muscle look.

AAKG- Helps promotes muscle fullness and vascularity and nitric oxide production.

ALPHA YOHIMBINE- Is the active metabolite of yohimbe it has a half life of 8 to 11 hours compared to 2 hours of regular Yohimbine it raises testosterone levels and increases libido. Alpha Yohimbine metabolites in to the liver which works synergistically to support the norepinephrine- promoted fat burning during exercise.

CREATINE- Is normally occurring metabolite found in red muscle tissue and has essential roll in energizing muscle tissue.

CAFFEINE- Maximize energy and increased performance.
