

MUSCLE FEAST

Muscle Feast Dextrose is a simple sugar made from corn and is chemically identical to glucose, or blood sugar. There are different benefits to taking Dextrose, including its ability to be quickly absorbed and replenish glycogen stores within the body post-workout. In addition to recovery, dextrose may be taken as a pre-workout as rapid source of energy.

Who can benefit from taking dextrose?

Muscle Feast dextrose is a high GI (glycemic index) carbohydrate. It quickly enters the bloodstream for maximum metabolism and energy, making it ideal for endurance athletes and bodybuilding.
