Food intolerances are caused by enzyme deficiencies and can lead to digestive discomfort in both children and adults. Supplementing the diet with specialized enzymes for gluten, lactose, phenol and casein digestion may assist in lessening discomforts common to intolerance.*

Digest Spectrum™ is a unique combination of high-potency enzymes that provides specialized digestive support for individuals who experience intolerance to foods containing gluten, dairy, phenols, vegetables and beans.*

Recommended Use: 1-2 capsules with each meal. More may be taken as needed. Capsules may be opened and contents mixed with food or juice.

Thera-blend™ is an exclusive process that combines multiple strains of enzymes that work in various pH levels. Thera-blend enzymes have been shown to be three times stronger and work more than six times faster than leading digestive supplements.* For more information, visit www.enzymedica.com.
