

Foster Regal's 800 mg Green Coffee Bean Extract is low in caffeine but contains 50% (400 mg) of a natural compound called **Chlorogenic Acid** which has been shown to inhibit the release of **glucose** while at the same time **boosting metabolism**.<sup>\*</sup> These two mechanisms work synergistically to inhibit fat absorption. It takes less energy to burn fat before it's stored and since fat absorption is slower and metabolism is higher your body burns more fat thanks to **Chlorogenic Acid**. When green coffee beans are roasted, the chlorogenic acid is destroyed therefore drinking coffee does not have the same effect.

**TAMPER EVIDENT:** Do not use this product if imprinted foil seal under cap is broken or missing.
