

Lactase is an enzyme necessary to digest the milk sugar, lactose. The activity of this enzyme may decline after childhood, and difficulty in digesting dairy products may develop. Symptoms of lactase deficiency after eating dairy products include gas, bloating, intestinal discomfort, cramps and/or diarrhea. The addition of FORMULA 375 lactase enzyme supplement to the diet when consuming dairy products or taking medicines or vitamins containing lactose can relieve the discomforts of simple lactase deficiency. FORMULA 375 lactase enzyme capsules may be emptied and added directly to milk or other liquid dairy products. Add one capsule per quart, mix and store 24 hours in the refrigerator.

Mfg. in an FDA Registered Facility using Good Manufacturing Practices (GMPs)

KEEP OUT OF REACH OF CHILDREN.

TAMPER EVIDENT: Do not use this product if imprinted foil seal under cap is broken or missing.

Keep tightly closed.

Store at room temperature: 59°-86° F (15°-30° C).

Conforms to USP <2091> for weight. Meets USP <2040> disintegration for maximum bioavailability.
