

Science Complementing Ancient Wisdom

Modern Science has identified in Maitake (*Grifola frondosa*) a proteoglycan, **Beta-1,3 glucan** and **Beta-1,6 glucans** combined with protein, as an active constituent to support the immune system.*

Maitake D-fraction® is a standardized form of the proteoglycan, specially developed to be optimal for oral administration.

✓ 4X more proteoglycan than Maitake D-Fraction® standard capsules.

Due to the natural variation of mushrooms, tablet color and appearance may vary slightly from batch to batch.
