

Most anti-stress products work by sedating the central nervous system, causing drowsiness and impairing mental function. **Serenelle®** helps you de-stress while increasing your energy and focus.*

- **Reduces occasional stress.*** A human study found that Sensoril® ashwagandha extract significantly reduced symptoms of occasional stress — including anxiety, heart palpitations, irritability, and sleeplessness.*
- **Produces calming brain waves.*** L-theanine and natural PharmaGABA® have been clinically shown to increase the production of alpha brain waves — indicating a relaxed state of alertness.* Synthetic GABA does not have the same effect.
- **Improves mood and mental alertness.*** Lemon balm extract (LBE) has been clinically shown to improve stress-induced negative mood and increase mental alertness.* Relesse LBE is guaranteed to contain the specific constituents responsible for the herb's cognitive effects.*
- **Balances hormones.*** Sensoril has been clinically shown to reduce the stress hormone cortisol, while boosting the energizing hormone DHEA.*

This product is suitable for vegetarians and gluten-free.
