

In 2003, the prestigious journal *Nature* reported on the discovery of PQQ — the first new vitamin discovered since 1948.

PQQ is unique due to its specific benefits for the mitochondria — the “power plants” of our cells. Scientific evidence suggests that mitochondrial damage is one of the main causes of aging.

Two human clinical trials found BioPQQ® improves short-term memory and focus.* Since the mitochondria generate energy that powers human life, PQQ may also fight age-related fatigue.*

VitaPQQ® was recognized by the highly prestigious Nutracon “Best New Finished Product of the Year” award.
