

A standardized cultured extract of medicinal mushroom mycelia (roots), AHCC® is one of the world's most researched specialty immune supplements, supported by over 30 human studies.

AHCC has been clinically shown to maintain optimal NK cell, T-cell, macrophage, and dendritic cell activity.

Unlike most other medicinal mushroom extracts, AHCC has a very low molecular weight of just 5,000 daltons and is rich in alpha-glucans — increasing absorption and efficacy. AHCC is currently used by an estimated 1,000 clinics worldwide.
