

Astaxanthin is a powerful acting antioxidant with multiple benefits for healthy aging.* But due to its low bioavailability, accessing those benefits is difficult. Compounding the problem, some people are worse absorbers than others, making it hard for them to derive full benefit from conventional astaxanthin supplements.

Our unique product unlocks the potential of this powerful nutrient with MicroActive® Astaxanthin, the form of this ingredient that is well-absorbed and released in the body over a period of 24 hours.

In fact, compared with regular astaxanthin, our product has been clinically shown to provide:

- 4 times greater bioavailability and higher continued absorption over time
- Sustained release, resulting in blood levels of astaxanthin that are 3x higher over 24 hours
