

Collagen is well-known for its anti-aging properties.\*  
But to stay youthful, skin and joints need 3 things:

1. Collagen to provide structure,\*
2. Proteoglycans to absorb shock,\* and
3. Hyaluronic acid to pad and cushion.\*

This unique synergistic formula provides all three by combining proprietary proteoglycans from salmon cartilage (as **Juvecol®**) with collagen and hyaluronic acid (from **BioCell Collagen®**). Human clinical studies have shown that Juvecol® and BioCell Collagen®, respectively, can produce improvements in skin elasticity and skin moisturization while reducing wrinkles and blotchiness.\*
