

This product has been carefully manufactured and packaged in strict conformance with industry and government standards.

Directions: As a dietary supplement, take 2 softgels one to two times daily or as recommended by a health care professional. Best if taken with meals.

A growing level of research reveals that Omega-3 fatty acids, known as EPA and DHA, help protect and support overall heart health. These acids are found in particularly fatty, cold water fish such as salmon, mackerel and herring, which are found in this supplement. Omega-3 fish oils also help contribute to good blood circulation. This unique supplement minimizes common fish burps and aftertaste associated with fish oil, as the active ingredients pass the stomach and are digested in the small intestine. Vitamin E has been added to help preserve freshness. Supportive but not conclusive research shows that consumption of Omega-3 fatty acids may reduce the risk of coronary heart disease.*

Keep Out of the Reach of Children. Store in a dry, controlled room environment.
