DESCRIPTION

Therapeutic class: Multivitamin.

INDICATIONS

- Vitamin deficiency states.
- Helping in pregnancy and lactation.
- Contributes to the treatment of states of exhaustion and infectious diseases.
- Nutritional supplement.

Pharmacokinetics

Physio-pharmacological EFFECTS: MULGATOL participates in important functions through proper multivitamin composition:

- Maintains the proper function of all cells, tissues and organs, including the functions of the digestive, nervous and cardio-vascular.
- Participate actively in the process of growth and development through their meaningful action on the metabolism of various nutrients such as proteins, carbohydrates and fats.
- Helps maintain the integrity of the skin and mucous membranes (and thus reinforce the defense against infection).
- Maintains adequate levels of calcium and phosphorus (and thus the normal structure and formation of bones and teeth).
- Involved in the mechanisms of stress.
- Maintains an adequate vision.
- Maintains the vitality and muscle strength.

CONTRAINDICATIONS

None known at the recommended dose.

PRECAUTIONS

Do not exceed the recommended dose. If symptoms persist consult your doctor.
Higher doses, prescription.

ADVERSE REACTIONS

None known at the indicated dose.
