

eResveratrol-200 contains 200 mg of 99% pure trans-resveratrol in a vehicle containing lecithin and glycerolmonostearate (an emulsifier) to improve absorption. Mixed tocopherols (as an antioxidant) and 50 mg of quercetin were added to enhance trans-resveratrol bioavailability. These capsules are Licaps

(Pfizer) made in a nitrogen atmosphere with an internal nitrogen bubble to prevent degradation of trans-resveratrol to the inactive form of cis-resveratrol and for long term preservation of freshness. A dose of 2 capsules per day (400 mg total) of trans-resveratrol is the approximate dose that David Sinclair of Harvard stated he was taking.

DIRECTIONS

Take one capsule in the morning and one in the evening (also see [dosage instructions](#)).

Warnings

eResveratrol is not recommended for growing children or pregnant women.
