

MUSCLE FEAST

Muscle Feast's Ultimate Gainer is designed with a combination of quickly digesting whey isolate protein and maltodextrin; along with slower digesting micellar casein and waxy maize. Unlike other mass gainers on the market, there are no empty calories in this product; you can be assured that every calorie in every serving of Muscle Feast's Ultimate Gainer is there to serve your weight gaining needs.

SUGGESTED USE:

Mix one serving (5 level Scoops) thoroughly into 20 ounces of water or beverage of your choice. We do not believe in using fillers in our weight gainer; we suggest using milk or milk substitute for better taste.

MIX 5 LEVEL (159g) SCOOPS THOROUGHLY WITH 20 OZ. OR MORE WATER (OR BEVERAGE OF CHOICE).

ALL NATURAL / GLUTEN FREE / SOY FREE
NO GMOs / GRASS FED / HORMONE FREE / ANTIBIOTIC FREE

WHEY ISOLATE

Whey Isolates are 90-98% pure protein that digests and absorbs rapidly and is, gram for gram, one of the highest quality forms of protein available. This level of purity is achieved through a cold, cross-micro and ultra-filtration process that removes the larger, less absorbent protein molecules; while also filtering out fat, lactose, and ash.

MALTODEXTRIN

Maltodextrin is a high glycemic index carbohydrate making it ideal to be taken post workout with protein or when fuel is needed. While maltodextrin digests quickly, it is actually a polysaccharide and not technically a sugar; making it an ideal energy source for those that don't tolerate sugar well.

MICELLAR CASEIN

Micellar Casein is designed to digest slowly and provide you with a sustained increase in amino acids to prolong muscle protein synthesis. Micellar casein is isolated from milk by filtration, preserving the structural integrity of the protein molecule. This process further provides many biologically active compounds that have direct immune and physiological benefits.

WAXY MAIZE

Waxy Maize is a specific type of cornstarch with a high-molecular weight. It is designed to provide long-term energy and may improve athletic performance. Most of the benefits of waxy maize starch come from its slow digestibility. Waxy maize starch has an average molecular weight 100 times greater than carbohydrates and contains no simple carbohydrates or monosaccharides. It may help improve exercise performance, promote recovery, and improve diabetes management.
