

Proteolytic Enzyme to Support Digestion†

Bromelain is an enzymatic protein derived from pineapples. As an enzyme, bromelain is described as proteolytic, meaning it digests other proteins. It is also described as a systemic enzyme, so it operates not just in the gastrointestinal tract but throughout the body in other systems.† Taking bromelain can support the digestion of protein rich foods. Bromelain can also support a healthy response to inflammation by countering circulating immune complexes that occur after bodily stress.†

CONTAINS NO artificial colors, flavors, or preservatives; no wheat, gluten, milk, eggs, peanuts, tree nuts, soy, crustacean shellfish or fish.

Store in a cool, dry place.

We Guarantee Our Supplements for Potency and Purity
