

DIRECTIONS: 1/4 teaspoonful (1.25 mL) by mouth daily or as directed by a physician. Shake well before each use.

DROPPER USE: Fill dropper to dose level. Dispense into the mouth with a gentle squeeze of the bulb. It is normal for a small amount of suspension to remain in the dropper.

WARNINGS: Do not exceed recommended dosage. The treatment of any anemic condition should be under the advice and supervision of a physician. Since oral iron products interfere with absorption of oral tetracycline antibiotics, these products should not be taken within two hours of each other. Occasional gastrointestinal discomfort (such as nausea) may be minimized by taking with meals. Iron products may occasionally cause constipation or diarrhea. If you are pregnant or nursing a baby, seek the advice of a health professional before using this product.

WARNING: Accidental overdose of iron-containing products is a leading cause of fatal poisoning in children under 6 years of age. Keep this product out of reach of children. In case of accidental overdose, call a doctor or poison control center immediately.
