

AMINOLASE® is a powerful enzyme blend that maximizes the benefits of ingested protein, allowing it to be utilized for muscle building, recovery, and immune function.* In a university study, **AMINOLASE** improved whey protein bio-availability far greater than the body's natural digestive process (pancreatin) alone. Wasted protein can cause gas, bloating, and kidney stress.* Whether you're a fitness enthusiast or a gracefully aging adult, **AMINOLASE** enables you to get the most out of the protein that you consume without

the digestive discomfort associated with protein-rich foods or supplements.*

SUGGESTED USE: Consume 1 capsule of Aminolase per 25 grams of protein. Take Aminolase with 8 oz of water at the beginning of each protein fortified dietary or supplemented meal.*

DELIVERY METHODS: When Aminolase capsules are opened and added directly to a protein beverage, the enzymes will rapidly begin converting protein into amino acids. Amino acids have a significantly different taste profile in comparison to protein, which may impact taste and texture. For best results, drink within 5 minutes of mixing, or simply swallow capsules and immediately chase with your favorite protein beverage.
