

**FLORAPHAGE®** The world's first prebiotic "PHAGE"\*. Phages or bacteriophages are microscopic proteins that allow good bacteria to proliferate within the digestive tract.\* **FLORAPHAGE** has the ability to force certain bacteria to release nutrients into the gut that act as a high-quality prebiotic food for our beneficial microflora to feed on.

Based on lab testing with several popular probiotic supplements, this remarkable prebiotic is able to increase the growth rate of supplemented probiotics by an average factor of 24x compared to control.\* **FLORAPHAGE** supports the proliferation of beneficial microflora, thereby promoting optimum immune and digestive health.

**SAFETY AND EFFICACY:** We consume bacteriophages every day. They have been used in agriculture for years as a gentle and non-toxic way to promote the growth of healthy bacteria. Floraphage is completely safe for human consumption and has GRAS safety status.

**SUGGESTED USE:** Take 1-2 capsules daily with 8 oz of water or as directed by your healthcare practitioner.\*
