

HCG MAINTENANCE™ Offers Dieters a Successful Weight Management Method, Based on Legitimate Medical Science

Congratulations! You were successful with Phases I & II using HCG Activator™ and following the HCG Diet Protocol. Phase III is now the most critical part of your weight-loss program. Over these three weeks, and beyond, your body will lock in its new weight "set-point" to effortlessly prevent you from regaining any unwanted pounds or inches.

So, whether you are taking a "break" for three weeks, and then starting another cycle of HCG Activator, or you have already reached your desired weight-loss goal, using **HCG Maintenance™**, you can comfortably sustain your new weight, along with continued healthy eating as instructed in the HCG Diet Protocol (contained free inside). Successfully following the instructions in this Phase should reset the body's weight "set-point" by positively influencing the hypothalamus. **Start today and here's what you can expect:**

- ✓ Reset your metabolism to a high normal state
- ✓ Eliminate sugar cravings and emotional urges to eat
- ✓ Prevent the abnormal future storing of fat in the "problem area" fat reserves within the body.

When you successfully complete the twenty-one days of Phase III using **HCG Maintenance**, you are ready to begin your new life as a thinner, lighter, more energetic, happier, healthy person who is no longer a slave to hunger, emotional cravings, and food.

INSTANTLY: Reduce cravings for sugary foods and emotional urges to eat.^Δ

AFTER 1 WEEK: Improve energy levels, balance blood sugar, and continue to lose additional pounds and inches of body weight.^Δ

AFTER 3 WEEKS: Effortlessly maintain new body weight^Δ and feel better about yourself and your new, improved appearance!
