

Hyperforin: The Proven "Mood Enhancing" Active in St. John's Wort

New clinical research reveals hyperforin-rich Perika® to be more effective in promoting a positive mood than low hyperforin St. John's Wort.¹ In fact, 10% more users ¹⁰ reported "much or very much improved" emotional status by using Perika®.

Perika's HyperSure® Difference

Hyperforin is either unstable and can lose potency over time. However, using the patented HyperSure® System technology, Perika® contains a guaranteed level of hyperforin to deliver clinically proven effectiveness.

Perika® is safety sealed with printed outer stabilizing film and printed inner seal. Do not use if either seal is broken or missing.
