

THE ULTIMATE NUTRIENT DELIVERY AGENT AND UNIVERSAL ANTIOXIDANT*

The R+ALA version of ALA is the purest form of Alpha Lipoic Acid. R+ALA helps the body remove sugar from the bloodstream and has an impressive ability to aid in the delivery of a wide variety of other nutrients, including creatine. Many people using R+ALA report higher energy levels for sustained periods of time.*

Commercially available ALA products on the market today tend to be cheaper and consist almost entirely of the S(-) isomer of Alpha Lipoic Acid. These inferior products have significantly weaker nutrient delivery and antioxidant properties. If a label does not specify R+ALA, it isn't.

ALLMAX R+ALA contains a full 125 mg of the pure biologically active R+ isomer, the mitochondrial form found naturally in the human body.*

Make the switch to the purest most bio-active ALA, ALLMAX R+ALA.
