Other Ingredients: Microcrystalline Cellulose, Polyethylene Glycol, Red Color Coating (Polyvinyl Alcohol, Polyethylene Glycol, FD&C Red #40 Lake, Titanium Dioxide), Croscarmellose Sodium, Magnesium Stearate, Stearic Acid

GLUTEN-, LACTOSE- AND SUGAR-FREE

CORVITA™ 150 is a prescription multivitamin/multimineral supplement used to improve the nutritional status of patients with iron deficiency.

CONTRAINDICATIONS

CORVITA™ 150 should not be used by patients with a known hypersensitivity to any of the listed ingredients. All iron compounds are contraindicated in patients with hereditary hemochromatosis or hemolytic anemias.

WARNING: Accidental overdose of iron-containing products is a leading cause of fatal poisoning in children under 6. **KEEP THIS PRODUCT OUT OF REACH OF CHILDREN.** In case of accidental overdose, call a doctor or poison control center immediately.

PRECAUTIONS

General: Do not exceed recommended dose. The type of anemia and the underlying cause or causes should be determined before starting therapy with CORVITA™ 150. Since the anemia may be a result of a systemic disturbance, such as recurrent blood loss, the underlying cause or causes should be corrected, if possible.

Folate Acid: Folate acid alone is an improper therapy in the treatment of pernicious anemia and other megaloblastic anemias where vitamin B₁₂ is deficient. Folate acid in doses above 0.1 mg daily may obscure pernicious anemia in that hematologic remission can occur while neurologic manifestations remain progressive. A fatal complication has been reported following both oral and parenteral administration of folate acid.

The patient's medical conditions and consumption of other drugs, herbs, and/or supplements should be considered.

Pediatric Use: Safety and effectiveness in pediatric populations have not been established.

Geriatric Use: Safety and effectiveness in elderly populations have not been established.

DRUG INTERACTIONS

There is a possibility of increased bleeding due to potential interaction with anticoagulants (e.g., Aspirin, Heparin, Clopidogrel).

ADVERSE REACTIONS

Adverse reactions with iron therapy may include constipation, diarrhea, nausea, vomiting, dark stools and abdominal pain. Adverse reactions with iron therapy are usually transient.

OVERDOSEAGE

The clinical course of acute iron overdose can be variable. Initial symptoms may include abdominal pain, nausea, vomiting, diarrhea, very dark stools, hematemesis, hypotension, tachycardia, metabolic acidosis, hyperglycemia, dehydration, drowsiness, pallor, convulsions, less likely, salivary shock and coma.

DESCRIPTION

CORVITA™ 150 is a red, oval biconvex tablet imprinted with "V1007".

DIRECTIONS FOR USE

Tablets should be taken daily as directed by a physician.

HOW SUPPLIED

CORVITA™ 150 tablets are supplied in unit dose packs of 10 (10 blister cards of 10 tablets each).

Product Code: 13811-066-10

STORAGE

Store at 20°-25°C (68°-77°F), excursions permitted to 15°-30°C (59°-86°F) [See USP Controlled Room Temperature]. Protect from light, moisture and excessive heat. Dispense in a light-resistant container as defined in the USP using a child-resistant closure.

KEEP THIS PRODUCT OUT OF REACH OF CHILDREN.

For use on the order of a licensed practitioner.
