

The Power of 2 Proven and Patented Nutrients. Maintain Normal Healthy Blood Glucose, Naturally.†

When you see truNature® CinSulin® think Cinnamon in its purest, safest, most potent form. CinSulin® is indeed Cinnamon but it's Cinnamon with a bit of a twist as we've put it through our patented water extraction process to deliver the only Cinnamon worthy of the TruNature® brand.

Cinnamon has been used for centuries by those looking to naturally manage their normal blood glucose level† and promote sugar metabolism†. However, as with many herbals when this herb is used in its natural state or as a whole herb most contain fat-soluble compounds. Fat-soluble compounds may accumulate in the body if ingested over long periods of time and this is a concern to many health care professionals.

Our water extract of cinnamon is a natural product that is superior to plain cinnamon in safety and effectiveness as a supplement. The concentration of 10:1 means that two 250 mg capsules contain the desirable compounds found in ten 500 mg capsules of table cinnamon.

Like Cinnamon, Chromium has a long history of helping to maintain healthy blood sugar levels in the normal range. Chromium Picolinate is the most readily absorbed form of chromium supplementation so it makes sense that we fortify our TruNature® CinSulin® with it.

2 Capsules deliver 500mg Cinnamon Extract Plus 200 mcg Chromium Picolinate.

Proven science on CinSulin® supports the following health benefits:

- Cinnamon Concentrate 10:1 strength
- Promotes Sugar Metabolism†
- For Healthy Blood Glucose Levels† (within the normal range)

Take two capsules daily preferably at mealtime with liquids.
