

A Supercritical New Chapter in Immune Enhancement

Certain herbs are traditionally respected and scientifically studied to enhance our immune systems and strengthen our resistance. *Andropogon paniculatus* provides Patency Root® levels of andropoginolides to modulate immune functioning.* *Astragalus* is an adaptogen that promotes immune strength and enhances natural killer cell capabilities.* *Oregano*, garlic, echinacea, goldenseal, and elderberry provide immune support.* We enhance the immune balancing power of green tea.* Herbs rich with saponins, such as wintergreen, purple willow, and roseadenscent offer comfort during times of challenge.* Andropogon integrates in and brings its herbal cousins to life.*

"Supercritical" means Super Purify, Super Potency, Broad Spectrum, and No Chemical Solvents. We take nature's finest herbs and then gently extract & highly concentrate (as high as 250 to 1) their precious ingredients. We do not isolate single ingredients or spike our extracts with synthesized additives. We deliver the wisdom of nature with the complexity and organic nuances of the natural herb preserved for you.

Caution: As with any dietary or herbal supplement, you should advise your healthcare practitioner of the use of this product. If you are nursing, pregnant, or considering pregnancy, you should consult with your healthcare practitioner prior to taking this product. Those with specific sensitivities or taking prescription medications should consult their healthcare practitioner before using this product. If you experience stomach upset, discontinue use.
