

USAGE: Take 1 capsule 1 to 2 times per day or as directed by your qualified healthcare professional.

NOTE: Consult a healthcare professional before using this product if you are trying to conceive, pregnant, or lactating, under the age of 18, or have a medical condition; if adverse reactions occur, discontinue use.

N-Acetyl Glucosamine is an aminosaccharide, synthesized from glucose and the amino acid L-glutamine, that has been stabilized by complexing it to an acetyl group.

N-Acetyl Glucosamine is the body's precursor to hyaluronic acid, which is part of the synovial fluid in joints.* N-A-G combines with mucin secreted from goblet cells to support the glycocalyx, a protective layer of glycoproteins and polysaccharides that lines the digestive tract.*

N-Acetyl Glucosamine is the versatile form of glucosamine.*

**Keep out of the reach of children.
Store in a cool, dry place.**
