

BioPure Protein® is a bioactive, pure whey protein concentrate with naturally occurring immunoglobulins—antibodies that function as vital components of the immune response. It provides ideal nutritional support for individuals who wish to add a high quality protein to their diet to help promote health and well-being.

BioPure Protein is prepared by utilizing a cutting selective transfer membrane process at controlled temperatures and pH to capture active proteins and peptides while preventing the protein from denaturing (becoming inactive).

Applications of BioPure Protein

BioPure Protein is ideally suited to promote lean muscle mass. It is suitable for children, the elderly, and athletes, as well as those who lead a busy lifestyle and find it difficult to consume adequate protein in their diet.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

DIRECTIONS: Mix about 2 scoops with a cold beverage or add to your favorite recipe once daily or as recommended by your healthcare practitioner. To prevent protein denaturation and maintain the protein activity level, do not mix in hot drinks or recipes that require baking or boiling. Also, do not mix with pineapples or papayas because their enzymes may denature the protein.

NOTICE: Use this product as a food supplement only. Do not use for weight reduction.

STORAGE: Keep tightly closed in a cool, dry place.

Contents sold by weight, not volume. Some settling may occur during shipping and handling. Serving size is measured by weight with a scoop included for your convenience. The amount of product contained in 2 scoops may be above or below 23 grams due to variations in handling and product density.
