Controlled Release Iron for Consistent Energy*

Many healthcare providers recommend taking an iron supplement if you're low on this essential mineral. But form matters. Enter Ferritin+, a plant-based ferritin-iron extracted from organic peas. Ferritin is a naturally protein-coated form of iron found in legumes that allows for controlled release and efficient absorption, which helps to minimize digestive upset. Our clinical studies have shown that plant-based ferritin iron can effectively increase and maintain healthy iron levels.* Support your energy levels and red blood cell production with Ferritin+.*
