

Cal Apatite Plus® provides advanced, bioactive support for healthy bone mineralization with microcrystalline hydroxyapatite concentrate (MCHC)—a calcium-rich, bone-derived supplement that provides a broad spectrum of macro- and trace minerals, Type 1 collagen protein, the intact portion of bone, and bioactive bone growth factors. Cal Apatite Plus features an exclusive, freeze-dried MCHC that provides higher levels of intact bone growth factors than other MCHC formulas. This unique formula also provides ipriflavone and vitamin D, for enhanced bone support.
