

Cal Apatite® with Magnesium provides advanced, bioactive support for healthy bone mineralization with microcrystalline hydroxyapatite concentrate (MCHC)—a calcium-rich, bone-derived supplement that provides a full spectrum of highly absorbable macro- and trace minerals, Type 1 collagen protein, the intact portion of bone, and bioactive bone growth factors. Cal Apatite with Magnesium features an exclusive, freeze-dried MCHC that ensures higher levels of intact bone growth factors than other MCHC formulas. This unique formula provides optimized levels of vitamin D and a blend of three forms of magnesium designed to be bioavailable to achieve a 2:1 calcium to magnesium ratio for comprehensive musculoskeletal support.

Calcium, along with exercise and a healthy diet, can play a significant role in reducing the rate of bone loss or bone thinning and in protecting bone strength. Magnesium also plays an important role in bone health. Over one-half of the total body stores of magnesium are found in bone tissue.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

DIRECTIONS: Take three tablets daily or as directed by your healthcare practitioner.

CAUTION: Keep out of the reach of children.

Formulated to Exclude: Wheat, gluten, corn protein, soy, dairy products, nuts, tree nuts, fish, crustacean shellfish, colors, artificial sweeteners, and preservatives.
