HYBRID RATIO ISOLATE (HIRI)

Ion-Filtration Technology ISOFLEX® employs a unique protein extraction technology called HRI. A hybrid of

isolate purification technologies incorporated at a specific ratio to produce a truly superior Ultra-pure Whey Protein Isolate. Cutting-Edge Hybrid-Ratio ion-Filtration (HRI) Technology allows ISOFLEX to retain an exceptionally high protein yield while maintaining enhanced bicactive whey fractions (chart on right). ISOFLEX contains absolutely NO Whey Concentrate. Concentrates have higher levels of fat and sugars with a lower percentage of protein and lower bloavailability than Isolates. While other brands use

Concentrates, ISOFLEX users know that isolates have a superior

protein percentage and won't settle for non-Isolate blends
