

DIRECTIONS: As a dietary supplement, take 1 teaspoon daily. Put one (1) teaspoon of the powder into a cup. Fill cup 1/2 full with hot water. CALNESIUM-CEE will begin to fizz. Stir until water is clear. Fill the rest of the cup with fruit juice, cold water or add an herbal tea bag and finish filling with hot water. Adequate calcium intake is important but daily intakes above 2000 mg are not likely to provide any additional benefits. For persons with a family history of osteoporosis, menopausal women, or elderly men and women, adequate calcium intake is linked to reduced risk of osteoporosis through the mechanism of slowing the rate of bone loss. Regular exercise and a healthy diet with enough calcium helps all women approximately 11 to 35 years of age maintain good bone health and may reduce their high risk of osteoporosis later in life.

TAMPER EVIDENT: Do not use this product if imprinted foil seal under cap is broken or missing. Mfg. in an FDA Registered Facility using Good Manufacturing Practices (GMPs). Keep tightly closed. Store at room temperature 59°-86° F (15°-30° C). Rev. #04
