

WAXIMAIZE™ is a corn based modified starch with unique properties in the human body. While most complex carbohydrates from normal food sources remain in the stomach to be digested, broken down into shorter carbohydrate sugar chains before entering the bloodstream, **WAXIMAIZE™** with its unusually high engineered molecular weight "Drops" through the stomach at twice the speed! Because of this, **WAXIMAIZE™** remains a complex or long chain carbohydrate as it enters the small intestine for absorption. In addition to this, **WAXIMAIZE™** has a very low Osmolarity which allows it to quickly and effortlessly cross into the bloodstream intact.

Stage 1. Once in the bloodstream **WAXIMAIZE™** draws subcutaneous water (Water trapped just under the skin) into the bloodstream, quickly increasing blood volume. This initial response reveals definition in muscles previously washed out by the thin film of what was previously perceived as body fat.

Stage 2. This increased blood volume causes visible veins to appear in the limbs to carry the increased blood volume to muscles. This vascularity adds to the appearance of a leaner physique.

Stage 3. This increased blood volume delivers **WAXIMAIZE™** to waiting muscles, overloading glycogen stores for an unparalleled "full" feeling. This glycogen loading fills muscle bellies revealing previously unseen peaks and size.

Waximaize™ in combination with other supplements including Creatine, Testosterone Boosters, Stimulants, N.O. Products, or Amino Acids will dramatically increase the speed and efficiency of absorption into the bloodstream and subsequently to muscles.

BIO-ENGINEERED WAXIMAIZE™

› COMPLEX CARB SUPPLEMENT

› SWELLS MUSCLES › BIGGER PUMPS

› INCREASES BLOOD VOLUME

Other Ingredients: Waxy Maize (Amylopectin), Natural and Artificial Flavors, Acesulfame potassium, Sucralose.
Contains: Corn Products.

Directions: Consult your physician before taking this or any dietary supplement. 1-2 servings of **Waximaize™** can be taken pre-workout to load muscle glycogen stores for larger harder pumps; during workouts to maintain high muscle glucose concentrations for sustained power and energy; and immediately post-workout to replenish muscle glycogen stores resulting in muscle fullness lasting for hours.

Waximaize™ quick uptake properties will speed and improve absorption rates of other supplements like Amino Acids, Creatines, Testosterone Supplements or Vitamins when taken together immediately post-workout

Waximaize™ can be mixed with 4-8 ounces of water or added it to your existing sugar free post-workout drink.
