

Forever A-Beta-CarE®

Former A-Beta-CarE® is an essential formula combining vitamins A (from beta-carotene) and E, plus the antioxidant mineral Selenium. Antioxidants are vital in the fight against free radicals (chemical molecules that arise from cell stress in the body and damage healthy cells).

Vitamin A plays an important role in vision, bone growth, reproduction, and cell division. It helps maintain the surface linings of the eyes and the respiratory, urinary, and intestinal tracts. **Former A-Beta Care!** is a specially formulated dietary supplement that supplies vitamin A to the body from beta-carotene. The body converts beta-carotene to vitamin A in the small intestine during digestion or when it is needed, leaving a low risk of vitamin A overdose (which can be toxic when taken alone in large doses). Beta-carotene is also a recognized antioxidant, making it an ideal companion for vitamins E and Selenium.

Vitamin E, a fat-soluble vitamin, is an excellent supplement for healthy skin. It also protects vitamins A and essential fatty acids from oxidation in the body cells and prevents breakdown of body tissues.

Selenium is a trace mineral and is one of the most powerful antioxidant nutrients known to work synergistically with both vitamin E and beta-carotene. It is beneficial in maintaining healthy skin, hair and good vision. Recent research

shows that Selenium is especially important to men's health.

This combination of nutrients, available all in one convenient product, is one of the most important considerations to good health.

Supplement Facts

Serving Size 1 Softgel	% Daily Value*
Amount Per Softgel	
Calories 5	
Vitamin A 12,500 IU	250%
(180% As Beta Carotene)
