

ORGONO® LIVING SILICA®
Mineral Based
COLLAGEN BOOSTER

ORGONO® LIVING SILICA® mineral-based silicon supplement is a formula designed for your well-being and to maximize your body's potential supplying a key trace substance, silicon, your body uses in joints, bones, hair, skin and nails from the inside out.*

LIVING SILICA®'s silicon-based ingredient is a trace element found in nature. The silicon ingredient benefits have been studied in human studies and this product is laboratory tested to ensure quality and safety.*

When it comes to silicon, absorption matters. LIVING SILICA® is a premier grade of silicon supplement. Our clinical scientist developed the patent-pending, proprietary process to allow the LIVING SILICA® to remain in a silicon form best suited for intestinal absorption.*

Test results with monomethylsilanetriol (MMST) supplementation in healthy adults demonstrated silicon absorption within 30 minutes of ingestion. Surrogate markers of silicon bioavailability showed 64% of the consumed MMST serving was excreted by the subjects compared to 43% of a cooked green bean serving and <4% for the ripe banana serving. Results available upon request during normal business hours.*

CAUTION:

Do not use if safety seal is damaged or missing. If pregnant, nursing, or on medication consult with your health care practitioner prior to use.

SUGGESTED USE:

Adults, as a dietary supplement, take one (1) tablespoon daily, preferably before meals. Store sealed bottle up to three years at 59-86 degrees F (15-30°C). Once opened, store bottle in the refrigerator up to three months.
