

Glucosamine HCl is the most versatile and bioavailable amino sugar that the body converts into essential biomolecules. Glucosamine is often called "cellular glue". It is the main building block for semi-fluids that lubricate joints and fill their cushioning sacks (bursa). It also forms the core of skeletal bone and of cell recognition molecules. Recognition cells are used by the body's defense systems to distinguish its own cells from other substances. "Sodium Free"

**TAMPER EVIDENT:** Do not use this product if imprinted foil seal under cap is broken or missing.

Keep tightly closed. Store at room temperature: 59°-86°F (15° to 30°C). **KEEP OUT OF REACH OF CHILDREN.**

Mfg. in an FDA Registered Facility using Good Manufacturing Practices (GMPs)

Conforms to USP <2091> for weight. Meets USP <2040> disintegration for maximum bioavailability.

**CAUTION:** Do not take this product if you are pregnant, nursing or allergic to shell fish.
