Keep out of reach of children. L786-1 Rev. 0212

Suggested Usage: In the wasting syndrome in chronic renal failure, uremia, impaired metabolic functions of the kidney and to maintain levels when dietary intake of vitamins is inadequate or excretion or loss is excessive. Also, highly effective as a stress vitamin.
Precautions: Folic acid may mask the symptoms of pernicious anemia in that hematologic remission may occur while neurologic manifestations remain progressive.
Dosage and Administration: One softgel daily, or as directed by a physician. If on dialysis, take after treatment.
