prevent any disease.

AAKG (Arginine Alpha-Ketoglutarate) is a metabolic derivative of

Arginine, which is a conditionally essential amino acid that has a

number of vital roles in the body. Arginine plays a pivotal role in the

urea cycle, helping to rid the body of excess ammonia. This amino

acid is also important in protein synthesis as well as for the support

of healthy immune function. As AAKG, this form of Arginine is a key

player in amino acid metabolism.*

SUGGESTED USAGE: As a dietary supplement, mix 1 ½ level tea-

spoons (4.2 g) of NOW® AAKG Powder into water or your favorite

juice. Take 2-3 times daily on an empty stomach. Not recommend-

ed for continuous, high-level use for more than 60 days.
