ULTIMATE 100% WHEY PROTEIN+ MASS GAINER

MuscleTech® research has engineered a brand-new, 5-in-1, hardcore mass gainer designed for individuals looking to put on an extreme amount of mass. MASS-TECH® EXTREME 2000 features 80g of protein, over 400g of carbs and over 2,000 mass-producing calories (when mixed with 20 oz. of skim milk), plus 8.3g of L-leucine, 10g of creatine, and 21 vitamins and minerals for huge size and strength gains. MASS-TECH® EXTREME 2000 has everything you need to bulk up, pack on muscle and smash through strength plateaus.*

1 100% Whey High-Protein Shake

MASS-TECH® EXTREME 2000 delivers more protein per serving than most other mass gainers available on the market. With a whopping 80g of premium protein (when mixed with 20 oz. of skim milk), your body will have all the building blocks it needs to build the size and muscle you're looking for.*

2 Multi-Phase Carbohydrate Complex

MASS-TECH® EXTREME 2000 supplies over 400g of carbohydrates (when mixed with 20 oz. of skim milk) through a multi-phase carb complex to spike your insulin levels and promote muscle glycogen replenishment. This will help maximize your muscles and put your body in an extreme anabolic state.*

3 High-Density, Clean-Calorie Drink

The new, scientifically superior MASS-TECH® EXTREME 2000 formula delivers over 2,000 calories (when mixed with 20 oz. of skim milk) and features high-quality whey protein and easy-to-digest complex carbohydrates. In a university study, subjects who added 2,000 calories to a high-protein diet and a weightlifting program gained 6.8 lbs. of mass (vs. 1.3 lbs. in the control group). This formula is so powerful you only need one serving a day!*

4 HPLC-Tested Creatine Monohydrate Drink

Unlike our competitors that contain little to no creatine, MASS-TECH® EXTREME 2000 contains a clinically validated 10g dose of creatine to help you increase strength and regenerate ATP stores that are reduced during resistance training. In a human clinical study, subjects gained 6 lbs. in just 6 weeks while using the same creatine dose found in MASS-TECH® EXTREME 2000!*

5 High-Potency Branched Chain Amino Acid Shake

Each serving of MASS-TECH® EXTREME 2000 (when mixed with 20 oz. of skim milk) delivers 17.5g of BCAAs, including 8.3g of musclebuilding L-leucine. L-leucine is a powerful nutrient signal that enhances mTOR activation and causes amplified protein synthesis. In a clinical study, L-leucine was shown to help subjects increase their 5-rep max strength by over 40% in just 12 weeks. What's more, when mixed with 20 oz. of skim milk, you get 15.1g of L-glutamine and precursor to support muscle recovery. You won't find this amount of amino acids in any other mass gainer on the market!*

BASED ON RESEARCH AT A LEADING AMERICAN UNIVERSITY

TEST SUBJECTS RAPIDLY ADDED MASS*

In an 8-week study, subjects consuming a high-protein diet containing approximately 2,000 calories to their regimen, the results were examined and, on average, subjects gained 6.8 lbs. of mass while control subjects gained 1.3 lbs. of mass.

ONLY HIGH BIOLOGICAL VALUE PROTEIN SOURCES

Directions: Shaker Cup: Mix 1/2 serving (3 scoops) with 10 oz. of water or skim milk in a shaker cup and consume twice daily. Blender: Mix 1 serving (6 scoops) with 20 oz. of water or skim milk in a blender and consume once daily. Take in the morning, between meals or after post-workout. Read the entire label before use and follow directions provided. Drink 8 to 10 glasses of water daily for general good health.

This product contains 10g of creatine monohydrate per serving, which is in addition to the 60g of protein per serving shown in the Supplement Facts. Creatine is not counted toward the total amount of protein in this product.

WARNING: Not intended for use by persons under 18. Do not use if pregnant or nursing. Childbearing age women should limit daily vitamin A intake to 3,000mg (excluding beta-carotene). Consult a medical doctor if you have a medical condition or before starting any diet or exercise program. KEEP OUT OF REACH OF CHILDREN.

Do not use if packaging has been tampered with. Store in a cool, dry place (60°F to 80°F).
