

Flavonoids are nutrients found in colorful fruits and plants beneficial to human health. Quercetin contributes to the brilliant rich golden color of the *Dimorphandra mollis* plant, which supplies flavonoid extracted from the seed pods. Bromelain's proteolytic properties help break down protein which helps support digestion. Bromelain is a naturally occurring enzyme from pineapple stems that helps increase the bioavailability and positive benefits of the flavonoid quercetin, supporting a sustained immune response.*

Helps support a sustained immune response*

Helps support circulatory and joint health*

Bromelain enzyme supports digestive health*
