

Directions: Take two or more capsules daily with or without meals.

Canacurmin is the only wild, raw, whole food CO₂ turmeric-hemp extract available. Because it's a whole food complex, it contains the full spectrum of curcuminoids, curcumin, and turmeric essential oils, plus hemp stalk terpenes and other key hemp ingredients, including phytocannabinoids. The turmerones are CO₂-extracted, which greatly increases the bioavailability and potency. Other turmeric products are mere chemical extracts or isolates, which are inferior. Studies have shown that curcuminoids, turmerones, and hemp terpenes support the body's healthy natural antiinflammatory response plus nervous system health.* You'll feel the difference: *fast*.
