Directions: As a dietary supplement for adults, take one (1) scoop once or twice daily with juice or water. Take with or without food.

Healthy Origins® Magnesium Bisglycinate Chelate is produced using chelation technology from Albion Laboratories, the world leader in amino acid chelate nutrition. The scientists at Albion™ have found a way to substantially increase the bioavailability of elemental magnesium by bonding it with the amino acid glycine. Amino acids are easily identified and assimilated by the body. Glycine is the ligand that supports the transport of magnesium into the intestinal cell, maximizing the bioavailability of the magnesium.*

Magnesium Bisglycinate Chelate has been the subject of clinical trials for cardiovascular health, women's health, respiratory health, neurological health and digestive health.*

Albion™, TRAACS™ and the Albion Gold Medallion design are trademarks of Albion Laboratories, Inc.
